Richmond County

Richmond County is the smallest in the province. The eastern and western parts of the county are joined at St. Peters Canal. A causeway connects Isle Madame with the south western part of the county.

Throughout the 1800's and until the mid 1900's the mainstay of economic activity within the county was fishing and fisheries related activities. Even today Isle Madame and the north eastern part of the county are closely tied to the fishery.

In the early 1950's the construction of the Canso Causeway created a year round deep water port in the southern portion of the Strait. Point Tupper has developed as a highly industrialized area on the basis of this port facility. While much of the residential and commercial developments, associated with this industrial activity, have located in Inverness County, the western portion of Richmond County has also undergone major changes. Highway No. 104 is completed from Port Hawkesbury to St. Peters and a new regional hospital has been constructed at Lower River Inhabitants.

n/a Not Available

Due to the lack of legal or official boundaries, the Census is not always able to distinguish the population of these unincorporated places from that of the surrounding area.

The population totals shown in this report for 1976 and 1981 should thus be considered as approximations.
